340B Savings Calculator & ROI Analysis Tool

Comprehensive Excel-Based Solution for 340B Program Optimization

340B Savings Calculator & ROI Analysis Tool

INTRODUCTION

The 340B Savings Calculator & ROI Analysis Tool is a comprehensive Excel-based solution designed to help covered entities accurately track, project, and optimize their 340B program savings. This tool integrates financial modeling, drug utilization data, and contract pharmacy analysis to provide actionable insights for 340B program management.

TOOL COMPONENTS

1. Program Overview Dashboard

Real-time program metrics

Executive summary visualizations

YTD savings tracking

Comparison to benchmark data

Performance trend analysis

2. Drug-Specific Savings Calculator

Line-item savings calculation

WAC vs. 340B pricing analysis

Therapeutic category breakdowns

High-impact drug identification

Volume-based savings projections

3. Contract Pharmacy ROI Analysis

Individual pharmacy performance metrics

Contract fee structure impact analysis

Prescription capture rate optimization

Geographic distribution analysis

Contract pharmacy comparison tools

4. Split-Billing Optimization Tools

Mixed-use setting analysis

Accumulation optimization models

Replenishment strategy evaluation

Inventory management recommendations

Missed opportunity identification

5. Program Expansion Modeling

New service area projections

Additional contract pharmacy modeling

Service line expansion analysis

Patient population growth projections

Incremental savings forecasting

6. Audit Preparation Support

HRSA audit readiness tools

Manufacturer audit preparation guides

Material breach risk assessment

Non-compliance financial impact models

Audit finding response tracking

7. Compliance Cost-Benefit Analysis

Staffing resource allocation optimization

Technology solution ROI calculation

Consulting service value assessment

Training investment analysis

Documentation system evaluation

8. Reporting & Documentation Templates

Board presentation templates

Regulatory reporting support

Budget justification models

Grant application support data

Community benefit documentation

SETUP INSTRUCTIONS

System Requirements

Microsoft Excel 2016 or newer

8GB RAM recommended for optimal performance

Windows 10 or macOS 10.14 or newer

Installation Process

1. Download the Excel file from the provided link 2. Enable macros when prompted 3. Review the Setup tab for configuration options 4. Enter organization-specific data 5. Save the file with your organization's name

Data Import Guidelines

Compatible with major pharmacy management systems

Accepts CSV, XLSX, and TXT file formats

Provides data mapping templates

Includes data validation tools

Supports both manual and automated data entry

USER GUIDE

Initial Configuration

1. Program Settings Tab

Enter covered entity information

Configure 340B program parameters

Set up user access controls

Customize reporting preferences

Define financial accounting periods 2. **Drug Database Setup**

Import drug formulary data

Configure pricing source connections

Set up NDC crosswalk mappings

Define therapeutic categories

Establish high-priority drug flags 3. **Contract Pharmacy Configuration**

Enter contract pharmacy details

Configure fee structures

Set geographic parameters

Define prescription qualification rules

Set up claims routing criteria

Regular Usage Workflow

1. Data Import

Import dispensing data (daily/weekly/monthly)

Update pricing information

Refresh contract pharmacy claims

Import purchase history

Update patient eligibility data

Run standard savings reports

Analyze savings by location/drug/time period

Review missed opportunity alerts

Evaluate contract pharmacy performance

Generate compliance monitoring reports

Model program expansion scenarios

Evaluate new contract pharmacy opportunities

Assess technology investment ROI

Project future savings based on trends

Develop optimization recommendations

Advanced Features

1. Custom Report Builder

Create tailored reports

Design executive dashboards

Develop board presentation materials

Generate regulatory documentation

Design staff performance metrics

2. Scenario Modeling

Evaluate policy change impacts

Model reimbursement rate changes

Project formulary adjustment effects

Assess patient mix changes

Model compliance investment returns

3. Integration Capabilities

Export data to third-party systems

Generate API-compatible outputs

Create audit-ready documentation

Support grant application data needs

Generate accounting system inputs

SUPPORT RESOURCES

Technical Support

Dedicated helpdesk access

Video tutorial library

Quarterly update notifications

Troubleshooting guides

Data recovery services

Training Resources

Implementation webinar series

User certification program

Advanced modeling training

Administrator role training

Customization workshops

Consulting Services

Custom implementation support

Advanced analysis assistance

Executive presentation preparation

Audit preparation support

Program optimization consulting
